Great Reviews from customers in 2017!

Good Morning from Back to Your Roots Soil Solutions.

The testimonials from our customers are coming and we are hearing very good things are happening. The test weights on your grains are up to 10% higher, and the quality is better than before. Producers are experiencing reduced weed pressures.

One of our customers in the Shellbrook area has noticed that where his field was hard and the water always laid on top, the soil is much softer now and the water has infiltrated into the soil, allowing him to grow crop on land that was once under water. Disease pressure is down, and he does not use fungicide. He also noticed that the yield on his silage and forage was the best ever this year. His cattle are consuming very little salt and mineral, and he estimates he has cut back to a third of the feed per day this winter. He also noticed that his weaned calves are extremely calm and quiet, much more so than in prior years. Less salt, mineral and feed equals money in his pocket.

If you would like to join the Biological Revolution and the Future of Farming, contact us today (see list of Product Consultants below).

Our fall sale continues. All product, with the exception of tea brewing, is 10% off. Products must be paid for by December 31, 2017, and delivery will be arranged for early spring. Do not forget to get your mixing tank set up so you are prepared for trouble free mixing.
